PROFESSIONAL SUMMARY

- Principal Engineering Manager and Tech Lead with 16+ years of experience building and leading high-impact engineering teams across cloud-native backend services, distributed systems, and enterprise storage
- Hands-on across the full stack — Multi-Cloud PaaS (AWS/Azure), Platform Engineering, Distributed Systems, UI/UX, and Linux internals
- Owned end-to-end product charter for Azure Databricks, a critical cloud-native Azure service with \$3B+ ARR
- Proven cross-functional leader with a track record of roadmap alignment, high-retention team management, and driving complex initiatives from feasibility through execution
- Adept at modern AI-first workflows and Agentic Design Patterns

EDUCATION

B.Tech – M.Tech, Computer Science & Engineering

Indian Institute of Technology, Kanpur | 2004 – 2009

– Specialization: Distributed Systems

– B.Tech CGPA: 8.1 / 10 · M.Tech CGPA: 8.8 / 10

– All India Rank 312 in IIT JEE (180,000+ candidates)

SKILLS

LEADERSHIP

Roadmap Planning, Cross-functional Collaboration, Performance Management, Hiring, OKR, Operational Excellence, Agile

ARCHITECTURE

Design Review, SLO, Distributed Systems

LANGUAGES

Java, Python, C, C#, JavaScript

FRAMEWORKS & LIBRARIES

ASP.NET Core, Spring Boot

CLOUD & INFRASTRUCTURE

Azure, AWS, GCP, Cloudflare, Docker, Kubernetes, Terraform, Kafka, Linux, OAuth, OpenTelemetry

DATABASES

PostgreSQL, MySQL, DynamoDB, CosmosDB

AI & AGENTIC SYSTEMS

Agentic Design Patterns, AI-first Workflows, LLM Orchestration, MCP Servers, LangChain, LangGraph, MCP

WORK HISTORY

Principal Engineering Manager

Microsoft — Azure Databricks | Bengaluru | Dec 2019 – Dec 2025

- Managed a team of 5 engineers and 7 vendors; achieved 100% retention and 2 out of 5 promotions within the tenure
- Owned end-to-end product charter for Azure Databricks (\$3B+ ARR) — customer-facing backend, frontend systems, and auxiliary components
- Developed the Service Vision Dashboard to centralize team objectives and support operational reviews, reducing incidents by 35% in 2 months
- Delivered as tech lead on Zero-Touch Region Deployment, Zero-Touch Certificate Management, and Network Security Perimeter initiatives
- Identified and prioritized key technical investments (e.g. BackfillWorkers) that enabled future product innovation and mitigated critical risks
- Collaborated with Product, Design, and cross-functional Engineering teams to align roadmaps for Azure's most strategic customers
- Tech Stack:** ASP.NET Core, Service Fabric, VMSS, KeyVault, Terraform, Azure Storage, Service Bus

SDE-2

Amazon — Amazon Lockers | Gurgaon | May 2016 – Sep 2019

- Developed an over-the-air upgrade system for a large fleet of locker hardware units
- Led a team of 5 engineers building accessibility solutions for mobility- and vision-impaired customers; project won 2 internal awards
- Defined technical architecture and built prototypes proving end-to-end strategy for accessibility initiatives
- Led scalability and operational burden reduction initiatives for support teams
- Tech Stack:** Java, Spring Boot, EC2, DynamoDB, RDS, Kinesis, SQS, SNS, Lambda, CloudFormation

Software Developer — Filesystems R&D

Tuxera Inc. | Finland | Apr 2014 – Feb 2016

- Laid the groundwork for Tuxera Flash Friendly Filesystem, a new product line
- Devised and implemented a concurrent block allocator and writeback aligner, improving write performance by 3×
- Designed an automated framework for evaluating filesystem lifetime on flash memory using characteristic workloads and wear statistics

WORK HISTORY *continued*

Senior Software Engineer — Filesystem Engineering

Oracle India / Pune / Jul 2013 – Apr 2014

- Improved readahead detection and identified key performance statistics for a highly scalable filesystem built on software transactional memory

MTS — Performance Analysis

NetApp India / Bengaluru / Nov 2010 – Jun 2013

- Engineering specialist for performance analysis of Filesystem, RAID, and storage modules within the ONTAP operating system
- Co-led performance characterization of WAFL's file cloning feature as part of a two-member team

Device Driver Engineer — CoreBSP

Qualcomm India / Hyderabad / Jul 2009 – Nov 2010

- Managed serial and Bluetooth host driver subsystems across multiple SoC targets
- Fixed critical inconsistencies targeting ARMv7 multi-core processors, addressing speculative readahead, weak memory consistency, lock contention, and mutual exclusion
